

Thank you for selecting our product,

Please ensure that you read these instructions thoroughly before utilizing your new Hexmat Absolute Isolator and Record Clamp.

1. Position the isolator mat directly on your turntable platter, with the magnets in the centre facing upwards. The magnets are directional and fully shielded to prevent any interference with nearby devices such as cartridges or tonearms.
2. Confirm that the vertical tracking angle (VTA) is accurately set on your turntable. If you are not familiar with this process, it is advisable to consult a professional to avoid potential damage to your cartridge or records.
3. When placing a vinyl record on the isolator, always install the Absolute clamp, which must be used during playback.
4. After stopping the turntable platter, remove the Absolute clamp by gently lifting it with your fingers. Avoid twisting or bending the clamp during removal.
5. Do not attempt to change records or flip sides while the platter is spinning, as this may cause damage.
6. Refrain from storing the clamp near electrical devices.
7. Ensure that the magnets are not closed without a vinyl record.

Please note:

- Do not attempt to open or disassemble the product.
- Store the product in a dry place and avoid exposure to direct sunlight.
- The warranty does not cover damages resulting from misuse or accidental harm to the product.
